MARKO SAMEH

BACKEND DEVELOPER | NODE.JS | EXPRESS | POSTGRESQL

Cairo, Egypt | +201203113955 | markosameh75@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Junior Backend Developer with a strong software engineering foundation and hands-on project experience across Node.js, Express, REST API integrations, PostgreSQL, Prisma, authentication/RBAC, and multi-tenant SaaS workflows. Brings production software delivery experience from frontend engineering roles, plus project work involving data models, automated testing, Docker-based workflows, and CI/CD. Focused on backend engineering practices, maintainable APIs, data integrity, and secure application workflows.

BACKEND TECHNICAL SKILLS

Backend Development Node.js, Express, REST APIs, API integration, server-side application workflows
Databases & Data PostgreSQL, Prisma, SQL, relational data modeling, multi-tenant data structures
Security & Architecture Authentication, role-based access control (RBAC), API security fundamentals, modular architecture
Testing & Delivery Vitest, React Testing Library, Playwright, Docker, GitHub Actions, CI/CD, Git, GitHub
Supporting Technologies JavaScript (ES6+), TypeScript, React, Next.js, Axios, Firebase, LLM APIs, structured outputs

PROFESSIONAL EXPERIENCE

Frontend Developer | Kulsys Technologies | Cairo, Egypt | Mar 2026 - Present

- Develop and maintain production business applications using React, Next.js, and TypeScript within a modular monolithic architecture.
- Own feature delivery from requirements analysis and implementation through testing, code review, deployment, release validation, and production support.
- Build enterprise platforms, dashboards, and POS systems while collaborating with backend engineers, designers, and stakeholders.
- Review code, troubleshoot production issues, and support scalable, maintainable application releases.

Full-stack Developer | Freelance | Remote | Oct 2023 - Present

- Delivered 11 web applications using React and Next.js, achieving 90+ Google Lighthouse performance scores.
- Worked directly with 10 clients to translate business requirements into production-ready applications and manage delivery iterations.
- Integrated application interfaces with data and API-driven workflows; improved page-load times by approximately 30% through rendering and state-management optimization.

AI Trainer | Outlier | Remote | Feb 2024 - Present

- Evaluate AI-generated code and responses for reasoning quality, technical accuracy, and alignment with task requirements.
- Apply structured evaluation criteria to improve data quality and model outputs, with practical exposure to prompt engineering and LLM evaluation.

PROJECTS

KPI Analyzer | *Multi-Tenant SaaS Platform* **Live Demo**

Tech: Node.js, PostgreSQL, Prisma, REST API integrations, RBAC, Docker, GitHub Actions, Next.js, TypeScript

- Built a KPI management platform for organizations, departments, teams, and users using a multi-tenant architecture.
- Implemented authentication and role-based access control (RBAC), KPI templates, scoring workflows, audit trails, and management dashboards.
- Worked with application data models and REST API integrations; integrated LLM-powered decision support using structured AI outputs.
- Used automated tests with Vitest, React Testing Library, and Playwright alongside Docker-based workflows and GitHub Actions CI/CD.

Coffee Brain | *Full-Stack Café Management System* **Project Video**

Tech: Django, React, inventory management, AI chatbot

- Developed a full-stack business platform combining café inventory management with a responsive marketing website.
- Integrated an AI-powered Barista chatbot for personalized recommendations and automated reporting; the project reduced manual administrative errors by 30%.
- Connected operational application workflows with a customer-facing web experience.

SpaceTechs Platform & Analytics Dashboard | *Interactive Portfolio + Analytics* **Live Website**

Tech: Node.js content APIs, React, React Three Fiber, Chart.js

- Implemented Node.js content APIs to load website content dynamically.
- Built modular dashboard visualizations and an interactive 3D interface with responsive, performance-focused rendering.

Personal Portfolio Website | *Portfolio & Recruiter/Client Landing* **Live Website**

Tech: Next.js App Router, JavaScript/TypeScript, SEO

- Built a mobile-first portfolio with separate content paths for recruiters and clients, using a modern application architecture.
- Achieved 90+ Lighthouse scores across Performance, Accessibility, SEO, and Best Practices.

EDUCATION

Future University in Egypt (FUE) & University of Cincinnati | Dual Degree Program, Computer Science & Information Technology
Bachelor's Degree | Sep 2021 - Jul 2025

CERTIFICATIONS & LANGUAGES

- Developing Back-End Apps with Node.js and Express - IBM, Dec 2025
- Foundations of Digital Marketing and E-Commerce - Google, Nov 2025
- HTML and CSS in Depth - Meta, Nov 2025

Languages: Arabic - Fluent | English - Intermediate
