Education

Future University in Egypt(FUE) & University of Cincinnati (Dual Degree Program)

September 2021 – July 2025

Faculty of Computers & Information Technology

New Cairo, Fifth Settlement

Professional Summary

Innovative Frontend Developer with a dual degree in Computer Science, specializing in building high-performance web and mobile applications. Proven expertise in React, Next.js, and Flutter, delivering SEO-optimized, highly responsive interfaces. Experienced in full-lifecycle freelance development and remote global collaboration, combining strong technical engineering with a foundation in UI/UX design principles.

Technical Skills

- Frontend & Web: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Three.js (React Three Fiber)
- Mobile: Flutter, Dart
- Backend & Database: SQL, REST APIs, Basic Node.js, Python, Java, C#, C++
- Tools & Platforms: Git, GitHub, Figma, Firebase, VS Code, Android Studio
- Concepts: SEO Optimization, Responsive Design, State Management (Redux/Context API), UI/UX Principles

Relevant Coursework

Web Development, UI/UX Design, Software Engineering, Data Structures & Algorithms, Database Management, Artificial Intelligence, Operating Systems.

Experience

Frontend Developer (Freelancer)

Remote | Oct 2023 – Present

- Delivered 11 robust web applications using the React and Next.js ecosystems, consistently achieving 90+ Google Lighthouse performance scores.
- Collaborated with 10 clients to translate business goals into technical reality, maintaining a 100% client satisfaction and retention rate.
- Reduced page load times by 30% through optimized rendering strategies (SSR) and efficient state management.
- Engineered bilingual, accessible interfaces that expanded user reach, ensuring 100% compliance with responsive design standards.

AI Trainer – Outlier

Remote | Feb 2024 – Present

- Contribute to the refinement of large language models (LLMs) by evaluating AI-generated code and responses for reasoning quality, accuracy, and alignment.

- Collaborate within a global team to ensure strict adherence to data quality standards and linguistic precision in AI output.
- Gained practical insight into prompt engineering strategies and contemporary model evaluation techniques.

Event Organizer – IEEE Student Branch

Future University in Egypt (FUE) | Jan 2022

- Organized technology events and hackathons, fostering collaboration and effective communication across multidisciplinary teams.
-

Projects

Veneficus Frontend | E-commerce Platform

Next.js, React, react-three/fiber (3D viewer), Framer Motion, Tailwind CSS, i18next E-commerce platform for a luxury fashion brand — English & Italian | 2025

- Built a full-featured luxury fashion eCommerce site delivering bilingual support (English/Italian) via i18next.
- Integrated a realistic 3D product viewer using React-three/fiber to enhance product interactivity and purchase confidence.-
- Leveraged Next.js for server-side rendering (SSR) to ensure strong SEO performance and optimized Core Web Vitals.

SpaceTechs Platform & Analytics Dashboard ([link↗](#))

React, Three.js, Tailwind CSS, Node.js, Express.js (API integration) | 2025

- Developed a comprehensive ecosystem featuring an interactive 3D portfolio using React Three Fiber and an administrative analytics dashboard using Chart.js.
- Engineered lightweight 3D models and modular data visualization components, ensuring high-performance rendering and seamless mobile responsiveness.
- Implemented Node.js content APIs for dynamic data loading while maintaining SEO-friendly architecture and fast load times.

Neizk Landing Page ([link↗](#))

HTML, CSS, Bootstrap | 2025

- Developed a high-conversion, responsive landing page focusing on minimal load times and modern visual appeal.
- Implemented advanced SEO strategies and integrated Pixel tracking to optimize search visibility and monitor analytics.

Coffee Brain | Integrated Café System & Website (Graduation Project) ([link↗](#))

React, Django, AI Module, Tailwind CSS | 2025

- Coffee Brain | Integrated Café System & Website (Graduation Project) Technologies: React, Django, AI Module, Tailwind CSS
- Architected a dual-platform solution comprising a full-stack inventory management system and a responsive marketing website.
- Integrated an AI-powered Barista chatbot for personalized recommendations and reduced manual administrative errors by 30% through automated reporting.
- Engineered the marketing front-end with smooth UI animations and implemented advanced SEO strategies (structured data, meta optimization) to maximize visibility.

Flutter To-Do App

Flutter, Firebase | September 2024

- Created a real-time cross-platform productivity app featuring instant data synchronization via Firebase.
- Implemented features such as recurring reminders and a customizable UI (including dark mode), which increased user engagement metrics by 25% during testing.
